

Name of Module:	Orotracheal Intubation							
Module Provider Level:		EMR		EMT	X	AEMT		Paramedic
Contributor(s) :	Travis Myklebust							
Instructional Setting:	X	Single Student	X	Small Group	X	Whole Class		
Learning Domain(s):	X	Didactic	X	Psychomotor	X	Affective		
General Description of Lesson:	EMR	N/A						
	EMT	N/A						
	AEMT	Applies knowledge of upper airway anatomy and physiology (fundamental depth, foundational breadth) to patient assessment and management in order to assure a patent airway via orotracheal intubation for patients over 12 years of age.						
	Paramedic	N/A						
Objective(s) of Lesson:	EMR	N/A						
	EMT	N/A						
	AEMT	1.1 Describe Sellick's maneuver and the use of cricoid pressure during intubation. 1.2 Describe the equipment needed to perform orotracheal intubation. 1.3 Describe the indications, advantages, disadvantages, and complications of orotracheal intubation. 1.4 Describe the visual landmarks for direct laryngoscopy. 1.5 Describe steps to properly perform orotracheal intubation. 1.6 Describe the methods of assessing, confirming, and securing correct placement of an orotracheal tube. 1.7 Describe the technique for extubation.						

	Paramedic	N/A		
Assessment type(s):	X	Quiz	X	Observation
	X	Lab Skill Sheet		Other:
Describe the assessment plan:	<p>Students must correctly perform Orotracheal Intubation Skill sheet without missing any critical criteria elements.</p> <p>Students must complete quiz with a minimum of a 70%</p>			
Describe electronic resource(s) used in this plan:	Orotracheal Intubation PowerPoint			
Materials and Resources used by teachers and students:	<p>Orotracheal Intubation PowerPoint Presentation</p> <p><i>Intermediate Emergency Care</i>, Principles and Practice, (Chapter 5).</p> <p>Orotracheal Intubation Skill Sheet</p> <p>AEMT Orotracheal Intubation Quiz</p> <p>10 cc syringe, stylet, (2-3) 7-8 mm tube, assorted laryngoscope blades and handle, BVM, airway manikin, oral airway, tape or commercial securing device, suction device, gloves, stethoscope, CO2 detector and Magill forceps.</p>			
Teacher Procedure:	<p>Class lecture should last no more than 2 hours.</p> <p>Demonstrate how to properly perform an oro-tracheal intubation</p> <p>Allow students to perform 5-10 successful intubations on a manikin.</p> <p>All students will take Quiz</p> <p>Each student will properly demonstrate how to perform an oro-tracheal intubation following the Orotracheal Intubation Skill Sheet.</p>			
Student Tasks:	Successfully perform oro-tracheal intubation on manikin following skills sheets.			
Time Required:	# of class periods:	4	# of minutes per class period:	60

Notes, tips, suggestions, and/or extension activities:	Please refer to the note pages on the PowerPoint presentation.
